Safety Instructions

- To use the Phone, please follow the instructions in this user manual.
- Use the power adapter supplied with your phone. Other power adapters may damage the phone.
- This phone is only for indoor use. And also avoid in high humidity, water and some other liquids.
- Do not use the phone during thunderstorms.
- CE
- FCC

WEEE Warning

To avoid the potential effects on the environment and human health as a result of the presence of hazardous substances in electrical and electronic equipment, end users of electrical and electronic equipment should understand the meaning of the crossed-out wheeled bin symbol. Do not dispose of WEEE as unsorted municipal waste and have to collect such

WEEE separately.

Cleaning

To clean the device, use an anti-static cloth. Please avoid cleaning liquids as they might

damage the surface or internal electronics of the phone.

FCC Statement

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference.

(2) This device must accept any interference received, including interference that may cause undesired operation.

2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.

Summary of changes

This section describes the changes to this user manual for each release and user manual version.

Change for Release x.0.4.4.27, Manual version x.0.4.4.27

Major updates have occurred to the following sections:

• UC924 supports 12 accounts

Change for Release x.0.4.0.10, Manual version x.0.4.0.10

Major updates have occurred to the following sections:

Label Scroll

Change for Release x.0.4.0, Manual version x.0.4.0

Major updates have occurred to the following sections:

- <u>IPv6</u>
- IPv4&IPv6

Change for Release x.0.3.98.O, Manual version x.0.3.98.O

Major updates have occurred to the following sections:

<u>Reboot in Talking</u>

Change for Release x.0.3.98.A, Manual version x.0.3.98.A

Major updates have occurred to the following sections:

<u>Auto Logout Time</u>

Change for Release x.0.3.98, Manual version x.0.3.98

Major updates have occurred to the following sections:

<u>Daylight Saving Time</u>

Change for Release x.0.3.93, Manual version x.0.3.93

Major updates have occurred to the following sections:

- <u>Check-Syn With Authenticate</u>
- <u>Call Back</u>

Change for Release x.0.3.88, Manual version x.0.3.88

Major updates have occurred to the following sections:

- <u>Visual Alert for BLF Pickup</u>
- Detect IP Conflict

Change for Release x.0.3.72, Manual version x.0.3.72

Major updates have occurred to the following sections:

- Voice Mail Tone
- Backup NTP Server
- Intercom Barge

Change for Release x.0.3.65, Manual version x.0.3.65

Major updates have occurred to the following sections:

Redial Mode

Change for Release x.0.3.63, Manual version x.0.3.63

Major updates have occurred to the following sections:

- <u>Suppress DTMF Display</u>
- <u>Suppress DTMF Display Delay</u>

Change for Release x.0.3.62, Manual version x.0.3.62

Major updates have occurred to the following sections:

<u>Auto Redial</u>

El-Itek

Getting Started

Packing List

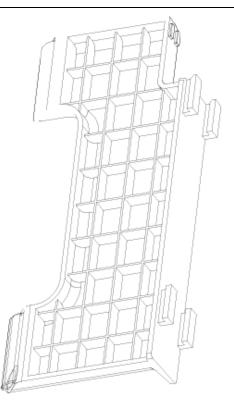

The package contains the following parts, please check if all the items are not missed:

1. The phone station

2. The phone stand

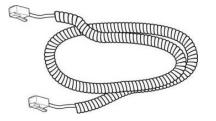

3. Handset

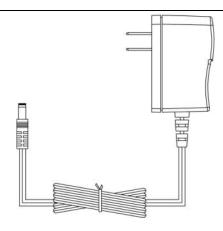

4. Headset cord

5. Power adapter

Getting Started

6. Ethernet cable

7. User Manual

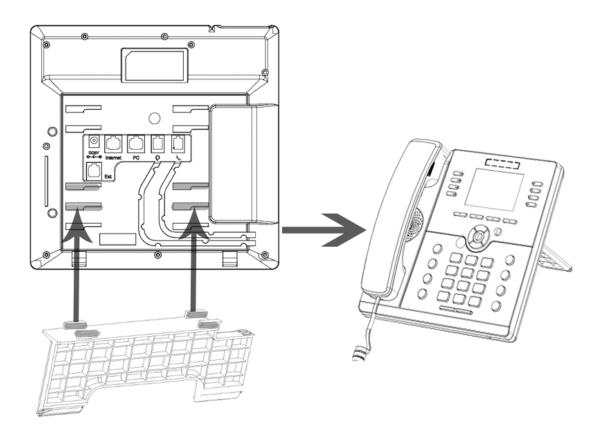

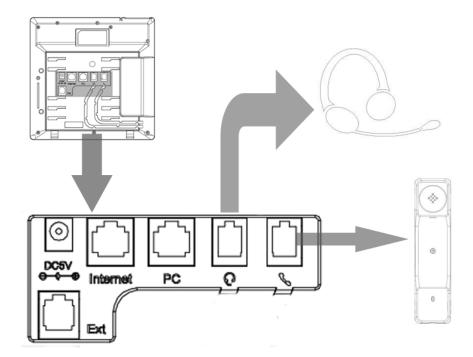

Phone Installation

1. Attach the phone stand

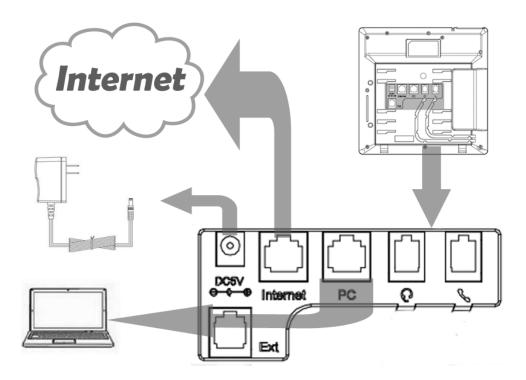

2. Connect the Handset and optional Headset

3. Connect the Network and Power

Initialization

After your phone has been powered up, the system boots up and performs the following steps:

Automatic Phone Initialization

The phone finishes the initialization process by loading the saved configuration. The phone LCD screen will display "Booting"

And then show "Initializing "during the initialization.

The IP Phone will upgrade the firmware if there is a new firmware on your server. And the IP Phone will show "Check firmware, please waitg..." after initialization.

Then IP Phone will show Reboot information:

By default, the phone attempts to contact a DHCP server in your network in order to obtain its valid network settings, e.g. IP address, subnet mask, default gateway, DNS server.

Status

You can view the system status of your phone via phone user interface or web user interface. The information of phone status includes: Information (e.g., Model, IP, MAC, Firmware, Hardware), Network (e.g., WAN Type, IP, Mask, LAN Type, Gateway, DNS ...), Account (e.g., register status of accounts).

To view the phone status via phone interface:

1. Press Menu →Status →Information

| Information | | |
|------------------|--|--|

Registration

To register via phone interface:

- 1. Press Menu→ Settings→Advanced Setting (default password: admin)→Accounts
- 2. Select the desired account
- 3. Select Enable for Account active
- 4. Select the desired profile of the account.
- 5. Fill the SIP User ID, Authenticate ID
- 6. Fill the Password and Name (shown on LCD).

7. Press Save to save the configuration.

| Account 1 | | |
|--------------------|-----------|------|
| 1.Account Active: | i Enable | <> |
| 2.Account Active: | Profile 1 | <> |
| 3.SIP User ID: | 532 | |
| 4.Authenticate ID: | 532 | |
| 5.Password: | ***** | |
| Cancel | Switch | Save |

Note:

If there is a port of sip server, you need to press "1" on the keypad, then you will find the ":".

Additional Information:

When the current input method is ABC/abc/2ab,

Pressing "1", you will find ", . ?:;"

Pressing "0", you will find "< > () {} []"

Pressing "*", you will find "*/"! @\$"

Pressing "#", you will find "#'%&*|"

To register via Web interface:

1. Login Web interface and Click Profile \rightarrow Basic.

| Home Profile / | Account Network Function Keys Setting [| Directory Management |

| Blinked red every 100ms | Alerting |
| Stay green | a member of the SCA group in active status when there is an incoming call designated for the SCA group |
| Stay red | Other member of the SCA group's led status when a member of the SCA group in active status |

Other Key Led

| Кеу | Description |
|-------------|--|
| Headset Key | When using in headset mode, the led is steady green or the LED is off. |
| Message Key | Blinked green when there is a new message or the LED is off. |
| Mute Key | Red when the mute the call, or the LED is off. |

User Interface

There are two ways to customize specific configurations on your IP phone:

- D The user interface on the IP phone
- D The user interface in a web browser on your PC

The hardware components keypad and LCD screen constitute the phone user interface, which allows the user to execute all call operation tasks and basic configuration changes directly on the phone. In addition, you can use the web user interface to access all configuration settings. In many instances, it is possible to use both the phone user interface and the web user interface to operate the phone and change settings. However, in some instances, it is only possible to use the phone or the web user interface.

Basic Setting Configuration

This part will mainly introduce the basic configuration as the Time, Language, and Volume...

General Settings

Web Login

1. Get the IP address: Press Menu \rightarrow Status \rightarrow Information.

| Information | | | |
|------------------|--------------------------|--|--|
| 1.Model: | UC924 | | |
| 2.IPV4: | 192.168.1.131 | | |
| 3.IPV6: | 1 2015:1fc1:1111:1111:3d | | |
| 4.MAC: | 00:1f:c1:1c:64:44 | | |
| 5.Firmware(IMG): | 1 2.0.4.4.29(2018-03-05 | | |
| Back | | | |

- 2. Input the IP Address in the web browser.
- 3. Input the user name (default is admin), password (default is admin).
- 4. Login successfully.

| | | | logout |

To change the Daylight Saving Time via Web interface

- 1. Setting \rightarrow Date &Time \rightarrow Daylight Saving Time
- 2. Select Disable or Enable or Auto for Daylight Saving Time.
- 3. Click SaveSet to save the configuration.

Note:

If the IP Phone cannot obtain the time and date from the Simple Network Time Protocol (SNTP) server, please contact your system administrator for more information.

Daylight Saving Time

Daylight Saving Time (DST) is the practice of temporary advancing clocks during the summertime so that evenings have more daylight and mornings have less. Typically, clocks are adjusted forward one hour at the start of spring and backward in autumn. Many countries have used the DST at various times, details vary by location. The DST can be adjusted automatically from the time zone configuration. Typically, there is no need to change this setting.

LED Status Setting

The LED Status setting mainly defines the power indicator LED.

To configure LED Status via Web interface:

- 1. Click Setting → Preference
- Select Yes or No for Power Status, Ringing Status, Miss Calls Status and Voice Message Status.

3. Click SaveSet for the setting.

For the LED status description, see: LED Instruction Power Indicator LED

| LED Status Setting: | | |
|----------------------|-------|------|
| Power Status | Yes | O No |
| Ringing Status | Yes | O No |
| MissCalls Status | O Yes | No |
| Voice Message Status | O Yes | No |

Key as Send

To configure Key as Send via Phone interface:

- 1. Press Menu \rightarrow Features \rightarrow Key as Send
- 2. Press > and < key to select the enable choice.
- 3. Press or Save soft key to save the configuration

| Key as Send | | | | | |
|------------------|----------------------------|------|--|--|--|
| 1.# as Send Key: | Enable | <.> | | | |
| | | | | | |
| | | | | | |
| | | | | | |
| | | | | | |
| Cancel | Switch | Save | | | |

To cancel # Key as Send via Phone interface:

- 1. Press Menu \rightarrow Features \rightarrow Key as Send
- 2. Press \bigcirc and \bigcirc key to select the disable choice.

3. Press or Save soft key to save the configuration

Network Setting

Htek IP Phone supports IPv4、IPv6、IPv4&IPv6.They have three modes of Network: DHCP,

Static, and PPPoE. The default mode is DHCP, it will obtain IP address and other information automatically.

If your phone cannot contact a DHCP server for any reason, you need to configure a static IP address manually.

When switch DHCP, Static IP and PPPoE to each other, or change the Static IP on Web interface, it will show the warning of restart as following.

| Network settings have been changed, phone to save changes? | Are you sure | reboot the |
|--|--------------|------------|
| | ОК | Cancel |

IPv4

If you set IP Mode to IPv4, IP phone will use IPv4 address. IPv4 has three network modes: DHCP, Static, and PPPoE

To configure IPv4 via Phone interface:

- Press Menu→Settings→Advanced Setting (password: admin) →Network→WAN Port →IP Port Mode.
- 2. Press > or < to change the IP Port Mode..
- 3. Press or Save soft key to save the configuration.

To configure IPv4 via Web interface:

- 1. Click Network→Basic→ Internet Port
- 2. Select IPv4 for Internet Port
- 3. Click SaveSet for the setting.
 - Internet Port
 IP Mode (IPv4/IPv6)
 IPv4

To configure DHCP via Phone interface:

- 1. Press Menu→Settings→Advanced Setting (password: admin) →Network→WAN Port →IPv4→DHCP mode.
- 2. Click Save and restart the phone.

To configure a static IP address via Phone interface:

- Press Menu→Settings→Advanced Setting (password: admin) →Network→WAN Port →IPv4 →Static mode.
- 2. Enter the parameters: IP, Netmask, Gateway, Pri.DNS(primary DNS), Sec.DNS (secondary DNS) in the corresponding fields.

| Static mode | | | | |
|-------------|-----|---------------|------|--|
| 1.IP: | | 192.168.1.131 | | |
| 2.Netmask | | 255.255.252.0 | | |
| 3.Gateway: | | 192.168.0.2 | | |
| 4.Pri.DNS: | | 192.168.0.2 | | |
| 5.Sec.DNS: | | 8.8.8.8 | | |
| Cancel | 123 | Delete | Save | |

3. Click Save and restart the phone.

l-Itek

| Static mode | |

IPv6

If you set IP Mode to IPv6, IP phone will use IPv6 address. IPv6 has two network modes: DHCP, Static

To configure IPv6 via Phone interface:

- Press Menu→Settings→Advanced Setting (password: admin) →Network→WAN Port →IP Port Mode.
- 2. Press > or < to change the IP Port Mode..
- 3. Press or Save soft key to save the configuration.

l-ltek

Basic Setting Configuration

To configure IPv6via Web interface:

- 1. Click Network→Basic→ Internet Port
- 2. Select IPv6 for Internet Port
- 3. Click SaveSet for the setting.

| Internet Port | | |
|---------------------|------|---|
| IP Mode (IPv4/IPv6) | IPv6 | ۲ |

To configure DHCP via Phone interface:

- Press Menu→Settings→Advanced Setting (password: admin) →Network→WAN Port IPv6→DHCP mode.
- 2. Click Save and restart the phone.

To configure a static IP address via Phone interface:

- Press Menu→Settings→Advanced Setting (password: admin) →Network→WAN Port →IPv6 →Static mode.
- 2. Enter the parameters: IP, IPV6 Prefix, Gateway, Pri.DNS(primary DNS), Sec.DNS (secondary DNS) in the corresponding fields.

IPv4&IPv6

If you set IP Mode to IPv4&IPv6, IP phone will support both IPv4 and IPv6 address. The settings of DHCP, Static, and PPPoE are same as above.

To configure IPv4&IPv6 via Phone interface:

- Press Menu→Settings→Advanced Setting (password: admin) →Network→WAN Port →IP Port Mode.
- 2. Press > or < to change the IP Port Mode..
- 3. Press or Save soft key to save the configuration.

To configure IPv4&IPv6 via Web interface:

- 1. Click Network \rightarrow Basic \rightarrow Internet Port
- 2. Select IPv4&IPv6 for Internet Port
- 3. Click SaveSet for the setting.

Note:

Wrong network parameters may result in inaccessibility of your phone and may also have an impact on your network performance. For more information about these parameters, contact your system administrator.

PC Port

Three modes for PC port: bridge, connect to Expansion Module and router.

To configure PC Bridge via Phone interface:

- Press Menu→Settings→Advanced Setting (password: admin) →Network→PC Port →Bridge mode.
- 2. Click Save.
- 3. Click the OK button, then the phone will reboot.

To configure PC router via Phone interface:

- Press Menu→Settings→Advanced Setting (password: admin) →Network→PC Port →Router mode.
- 2. Enter the IP, Netmask and DHCP server
- 3. Click Save.
- 4. Click the OK button, then the phone will reboot.

To configure PC, Connect to Expansion Module via Phone interface:

- Press Menu→Settings→Advanced Setting (password: admin) →Network→PC Port
 → Connect to Module.
- 2. Click Save.
- 3. Click the OK button, then the phone will reboot

To configure Bridge via Web interface:

- 1. Click Network→PC Port
- 2. Select As Bridge
- 3. Click SaveSet and the phone will reboot automatically
 - PC Port
 As Bridge

3

To configure Router via Web interface:

- 1. Click Network \rightarrow PC Port
- 2. Select As Router
- 3. Fill the IP address and other necessary information.

4. Click SaveSet and the phone will reboot automatically

Contact Setting

This section provides the operating instructions for managing contacts. The topics include:

- Local Directory
- Remote Phonebook
- LDAP
- Search Contact

Local Directory

In the directory, you can add or delete your friends, business partner or anyone others' phone No., so you will not forget their number. Or put some anonymous phone No. in the blacklist to prevent from being disturbed. The local Directory can add up to 1000 contacts.

A. To add contacts list into local directory

To add contacts manually via Phone interface

- 1. Press Menu \rightarrow Directory \rightarrow Local Contacts
- 2. Press Add soft key.
- 3. Enter the necessary information as Name, Phone number...
- 4. Press Save soft key or $\textcircled{}^{(\mathcal{V})}$ to add the contacts successfully.

| Add Contacts | | | | |
|------------------|-----|--------|------|--|
| 1.Name: | | Luisa | | |
| 2.Number: | 860 | | | |
| 3.Mobile Number: | | | | |
| 4.Other Number: | | | | |
| 5.Account: | | Auto | <> | |
| Cancel | abc | Delete | Save | |

To add contacts from history via Phone interface:

- 1. Press History soft key or press Menu \rightarrow History \rightarrow Local History
- 2. Press and to select the targeted one. (Press and switched

among the All Calls, Missed Calls, Received Calls, Dialed Calls and Forwarded Calls).

- 3. Press Option soft key \rightarrow Add to Contacts
- 4. Edit the necessary information as Name, Phone number...
- 5. Press Save soft key or to add the contacts successfully.

To add contacts via Web interface:

- 1. Click Directory→Directory
- 2. Enter the name, number and some other information.

3. Press Add and then press Save button.

B: To add contacts into blacklist

To add blacklist manually via Phone interface:

- 1. Press Menu \rightarrow Directory \rightarrow BlackList
- 2. Press Group soft key.
- 3. Press Add soft key.
- 4. Enter the Name and select the Ring Tone.
- 5. Press Save soft key or to add the Group successfully.
- 6. Enter the added Group, then press Add soft key.
- 7. Enter the necessary information as Name, Phone number...
- 8. Press Save soft key or to add the contacts successfully.

To add blacklist from history via Phone interface:

- 1. Press History soft key or press Menu \rightarrow History \rightarrow Local History
- 2. Press $\textcircled{\ }$ and $\textcircled{\ }$ to select the targeted one.
- 3. Press Option soft key \rightarrow Add to Blacklist
- 4. Edit the necessary information as Name, Phone number...
- 5. Press Save soft key or 🕑 to add successfully.

To import or export the contact list

-ek

You can manage your phone's local directory via phone or web user interface. But you can only import or export the contact list via Web interface.

To import an XML file of contact list via Web interface:

- 1. Click on Directory \rightarrow Directory
- 2. Click Choose file to select a contact list file (file format must be .xml) from your local system.
- 3. Click Import XML to import the contact list.

To export an XML file of contact list via Web interface:

- 1. Click on Directory \rightarrow Directory
- 2. Click Export XML to export the contact list.

To import a CSV file of contact list via Web interface:

- 1. Click on Directory \rightarrow Directory
- 2. Click Choose file to select a contact list file (file format must be .csv) from your local system.
- 3. Click Import Csv to import the contact list.

To export a CSV file of contact list via Web interface:

- 1. Click on Directory \rightarrow Directory
- 2. Click Export Csv to export the contact list.

| Photo | Auto 🔻 | Import Local Contacts |
|---------------|-------------------|----------------------------------|
| Add Edit | Search | Choose file No file chosen |
| GroupInfo | | Import XML Export XML |
| Group Ring | Auto 🔻 | Choose file No file chosen |
| Add Edit | Delete Delete All | Import Csv Export Csv Show Title |
| Note: | | |

If the xml file and CSV file have more than 1000 contacts, the phone will only upload 1000 contacts.

Remote Phonebook

To set Remote Phonebook via Web interface:

- 1. Login the Web interface and click Directory→Remote Phone Book
- Fill the path of the remote file in the Phone Book URL field.
 For example, http://192.168.0.106/Phonebook/Remote_Phonebook/remotephonebook.xml
- 3. Fill the Name and then click

SaveSet to save the configuration.

| E l-Itek | Home | Profile Account Netw | vork Function Keys 3 | Setting Directory Management |

| | | SaveSet | ncel | |

To check the contacts via Phone interface:

Press Directory \rightarrow Left Button \rightarrow Left Button, and you can see the item you set, press Update and then enter you will find the detail. For More detail, please refer to: <u>www.htek.com</u>.

Note:

Every remote phonebook, only supports 1000 contacts.

LDAP Phonebook

When use the LDAP feature, you can get the LDAP Phonebook directly.

To configure LDAP via Web interface:

- 1. Login Web interface and click Directory→LDAP
- 2. Fill the LDAP Name Filter:
 - a) This parameter specifies the name attributes for LDAP searching. The "%" symbol in the filter stands for the entering string used as the prefix of the filter condition.
 - b) For example, (cn=%), when the name prefix of the cn of the contact record matches the search criteria, the record will be displayed on the IP PHONE LCD.
- Fill LDAP Number Filter: This parameter specifies the number attributes for LDAP searching.
- 4. Fill Server Address: Fill the domain name or IP address of the LDAP Server. For example: 192.168.0.9
- 5. Port (the port of the LDAP Server), Base, User Name, Password
- 6. Max.Hits(1-32000): the maximum number of the search results to be returned by the LDAP server.
- 7. LDAP Display Name: the display name of the contact record displayed on the LCD screen.
- 8. Fill the relative value and then click SaveSet to save the settings.

Following is the example screenshot for the configuration.

| Luisa | | 860 | |
| S. A. | | | |
| | | | |
| | | | |
| Filter: 86 | | | |
| Back | 2aB | Delete | |

To search contact in Local contacts:

- 1. Click the Directory soft key on Idle interface.
- 2. Click the button and select the Local contacts list.
- 3. Click the More soft key, then you can see the Search soft key
- 4. Click the Search soft key, you can enter the desired part of name or part of number.
- 5. With the search content to match the contact will be automatically displayed on the LCD within 5 seconds.

To search contact in Remote contacts:

- 1. Click the Directory soft key on Idle interface.
- 2. Click the > button and select the Remote Contacts list.
- 3. Select the desired Remote Contact and click Enter soft key.
- 4. Click the Search soft key, you can enter the desired part of name or part of number.

6. With the search content to match the contact will be automatically displayed on the LCD within 5 seconds.

To search contact in LDAP contacts:

- 1. Click the Directory soft key on Idle interface.
- 2. Click the DAP Contacts list.
- 3. Enter the first character or more of contact's name or number.
- 4. With the search content to match the contact will be automatically displayed on the LCD within 5 seconds.

Call History Setting

Call History

This phone maintains call history lists of Dialed Calls, Received Calls, Missed Calls and Forwarded Calls. The call history list supports up to100 entries in all on Phone interface and more than 1500 items. You can check the call history, dial a call, add a contact or delete an entry from the call history list. You should enable the history record feature in advance.

To enable the history record feature via Phone interface:

- 1. Press Menu→Features→History Setting
- 2. Press > and < or Switch soft key to enable History record.
- 3. Press Save soft key to save the configuration.

Basic Setting Configuration

l-ltek

To check the call history via Phone interface:

- 1. Press the History soft key. The LCD screen displays All Calls list.
- 2. Press Right or Left Key to switch among All Calls, Missed Calls, Received Calls, Dialed Calls and Forwarded Calls.
- 3. Press to select the desired entry.
- 4. Press the Option soft key, and then select Detail from the prompt list.

To delete an entry from the call history list via Phone interface:

1. Press the History soft key.

- 2. Press Right or Left Key to switch among All Calls, Missed Calls, Received Calls, Dialed Calls and Forwarded Calls.
- 3. Press UP or DOWN key to select the desired entry.
- 4. Press the Delete soft key.

To delete all entries from the call history list via Phone interface:

- 1. Press the History soft key.
- 2. Press Right or Left Key to switch among All Calls, Missed Calls, Received Calls, Dialed Calls and Forwarded Calls.
- 3. Press the Option soft key, and then select Delete All from the prompt list.
- 4. Press the OK soft key.
- 5. Press the OK soft key to confirm the deleting or the Cancel soft key to cancel.

To check the call history via Web interface:

- 1. Click Directory→ Call History
- 2. Click Dialed List, Missed List, Received List, Forwarded List then you can see the history list.

Dial Plan

Dial plan is a string of characters that governs the way this phone processes the inputs received from your phone keypad. This phone supports dial plan with following accept digits:

0

| 1,2,3,4,5,6,7,8,9,0, *, # | 1 | ,2,3, | 4,5 | ,6,7 | ,8,9 | ,0, | *, | # |
|---------------------------|---|-------|-----|------|------|-----|----|---|
|---------------------------|---|-------|-----|------|------|-----|----|---|

| Grammar | Description |
|---------|--------------------------|
| Х | any digit from 0-9; |
| XX+ | at least 2-digit number; |
| ٨ | exclude; |

Basic Setting Configuration

| , | hear dial tone; |
|---------|--|
| [3-5] | any digit of 3, 4, or 5; |
| [147] | any digit 1, 4, or 7; |
| <2=011> | replace digit 2 with 011 when dialing. |

To configure dial plan via Web interface:

- 1. Click Account \rightarrow Basic \rightarrow Dial Plan.
- 2. Fill the value in dial plan field.
- 3. Click SaveSet to save the configuration.

Emergency Call

Public telephone networks in countries around the world have a single emergency telephone number (emergency services number), that allows a caller to contact local emergency services for assistance when required. The emergency telephone number may differ from country to country. It is typically a three-digit number that can be easily remembered and dialed quickly. Some countries have a different emergency number for

each of the different emergency services.

You can specify the emergency telephone numbers on the IP phone for contacting the emergency services in an emergency situation.

To configure emergency call via Web interface:

- 1. Click Setting→Features→Phone Lock
- 2. Enter the emergency services number (e.g.110,119,120) in the Emergency field,
- 3. Click SaveSet to save the configuration.

Exp Key

It only works when there is an expansion module connected with the phone. For Exp Key configuration, please refer to: <u>UC46 User manual</u>.

Basic Call Features

Place a Call

There are three ways to dialing a call: Handset, Headset and Hands-free speakerphone.

To place a call by Handset

- 1. Pick up the handset, or press a line key and dial the necessary number.
- 2. Press \bigcirc or \bigtriangledown or press the Send soft key, then the call is sending.

To place a call by Headset:

- 1. Press the (light is Green),
- 2. Enter the desired number.
- 3. Press (), or press the Send soft key, then the call is sending.

Using headset to place and answer calls for all time

- 1. Click Web interface Setting \rightarrow Preference
- 2. HeadSet Priority → Enable
- 3. Ringer Device For HeadSet \rightarrow Use Headset
- 4. Click SaveSet to save the setting.

| HeadSet Priority | Enable • |
|---------------------------|-------------------------|
| Ringer Device For HeadSet | Use HeadSe [™] |

Placing a call by hands-free speakerphone

El-Itek

- 1. Press the (), or press the Line key, then you can hear the dial tone.
- 2. Press the number.
- 3. Press H or V or press the Send soft key, then the call is sending.

To place a call by call history or Directory via Phone interface.

- 1. Press the History /Directory soft key (On the idle page) or Menu \rightarrow History /Directory
- 2. Press () and () to select the targeted one.
- 3. Press the Send soft key, or , or , or the corresponding line key, then the call is sending.

Note:

- 1. The key is set to be a send key. For more information, refer to the Key as Send on page
- 2. During the call, you can also change among Headset, Handset or Free-speaker mode.

Making two calls with one line and one account

- 1. Press a line key and dial phone number, then make a call.
- 2. Press Hold soft key and then press New Call soft key.
- 3. Dial another phone number,
- 4. Press the Send soft key, or (), then make the second call.

End a Call

Here shows to end a call during three modes: **To end a call by Handset**

Press the End Call soft key or hang up the handset, or press \bigotimes

To end a call under Headset Mode

Press the End Call soft key or press 0, or press \bigotimes .

To end a call under hands-free speakerphone Mode

Press the End Call soft key or press , or press

Note:

During the conference, to end the call is same as mentioned above.

Redial a Call

To redial the last placed call from the IP Phone:

Press in the idle interface.

Receive a Call

There are three ways to receive a call when the phone is ringing:

To receive a call by handset

Pick up the handset and now the conversation is built.

To receive a call by headset

Press and now the conversation is built.

To receive a call by hands-free speaker

- 1. Option 1: Press idirectly.
- 2. Option 2: Press Answer soft key.
- 3. Option 3: Press the Line key (flashes red).

Moreover, some other action can be done by soft key when the call is coming.

1. To press the Reject soft key to reject the call. Or press \bigotimes to reject the current call.

- 2. To press Forward to forward to another phone.
- 3. To press Silence soft key, and then the call will keep silent, no ring tone display.

Incoming Call Show Mode

There are two incoming call show modes for this phone:

- 1. name and number of the contacts
- 2. name and number of the incoming call and the account which is connecting

To set incoming call show mode via Web interface:

- 1. Click Setting → Preference
- 2. Select the desire mode for the incoming call show mode
- 3. Click SaveSet to save the setting.

| Incoming Call Show Mode | Peer Name & Peer Number |
|-------------------------|-------------------------------------|
| | Peer Name & Peer Number & Self Name |

Auto Answer

Enable auto answer feature, you will answer all incoming call automatically.

To enable Auto Answervia Web interface

- 1. To Click Profile \rightarrow Advanced
- 2. To choose Yes for the Auto Answer.
- 3. To click SaveSet to save the configuration.

| Send Anonymous | 🖲 No 🛛 Yes 🕐 |
|--------------------------------|--------------|

| | Always Check |
| | Automatic |
| Auto Answer | 🔍 No 💿 Yes |
| Allow Auto Answer By Call-Info | 🔍 No 🔍 Yes |
| Turn off Speaker on remote | No Ves |

To Disable Auto Answer via Web interface

- 1. To Click Profile \rightarrow Advanced
- 2. To choose No for the Auto Answer.
- 3. To click SaveSet to save the configuration.

Call Hold

When using the hold feature, the Hold icon will show on the display.

To make a call on hold during three modes:

To hold a call under handset mode:

1. Press Hold soft key or loop to hold the current call.

2. Press Resume soft key or it to resume the call on hold.

To hold a call under headset mode:

- 1. Press Hold soft key or it hold the current call.
- 2. Press Resume soft key or it to resume the call on hold.

To hold a call during the speaker mode:

- 1. Press Hold soft key or it hold the current call.
- 2. Press Resume soft key or it to resume the call on hold.

Call Transfer

This phone supports Blind, Attended and Semi-Attended Transfer.

Blind Transfer

When you use this feature, you can :

- 1. Press or Transfer soft key during the conversation, the call is on hold now.
- 2. Enter the number that transfers to.
- 3. Press or Transfer soft key, and now the blind transfer completed.

Attended Transfer

When you use this feature, you can

1. Press or Transfer soft key during the conversation, the call is on hold now.

| 📣 Transfer to | | | | | | |
|---------------|--------------|--------------|--------------|--|--|--|
| v 532 | 5 | | å 533 | | | |
| LDAP | 🔌 carol_test | å 534 | | | | |
| | t 533 | | _ 🖲 Record | | | |
| | t 534 | | 1234 | | | |
| Transfer | Send | Delete | Cancel | | | |

- 2. Enter the number that transfer to, and press the send soft key or $\textcircled{\text{B}}$ or $\textcircled{\text{C}}$.
- 3. Start the second conversation, press or Transfer soft key, then transfer completed.

NOTE:

To transfer calls across SIP domains, SIP service providers must support transfer across SIP domains. Blind transfer will usually use the primary account SIP profile.

Semi-Attended Transfer

- 1. Press or Transfer soft key during the conversation, the call is on hold now.
- 2. Enter the number transfer to, and press the send soft key or *(m)*, then you can hear the ring tone.
- 3. Press or Transfer soft key, and now the Semi-attended transfer completed.

BLF Transfer

- 1. Set a Programmable Key or Line Key is set as BLF. For how to set BLF, please refer to BLF
- 2. Press or Transfer soft key during the conversation, the call is on hold now.

3. Press BLF key then realize blind, attended and Semi-Attended Transfer.

Hold transfer on hook:

- 1. Setting \rightarrow Features \rightarrow Transfer Settings: Hold Transfer On Hook: ON.
- 2. A place a call to B, B answer, A press the Hold soft key and place a call to C, A cancel the call when C is ringing or answering, then C and B in the same call and the transfer is successful.

| Transfer Settings | | | |
|---------------------------|------------|---------------------|--|
| Blind Transfer On Hook | On | Off | |
| Semi-Attended Transfer | On | Off | |
| Attended Transfer On Hook | On | Off | |
| Transfer Mode via DSSkey | Attended 1 | Attended Transfer • | |
| Hold Transfer On Hook | On | Off | |

Hold transfer on Three Way conference:

- 1. Setting \rightarrow Preference \rightarrow Three Way Call Release Type: Transfer.
- 2. A place a call to B, B answer, A place a call to C again, C answer, A press the Conference soft key then A, B and C will establish meeting.
- 3. A press the End Call soft key or on-hook to exit the meeting in the process of talking.
- 4. Then B and C will continue to talk.

Broadsoft Group

When using the BroadSoft Group feature, by just pressing the key you can enter the Broadsoft Contacts interface quickly.

To configure the Broadsoft Group via Phone Interface

- Press Menu → Features → Function Keys → Line Keys as Function Keys → Line Key2(for example)
- 2. Press > and < key to select the Broadsoft Group in the Type field.

3. Press or Save soft key to save the configuration

To configure the Broadsoft Group via Web interface

- 1. Click Function Keys \rightarrow Line Key.
- 2. Select the desired Key and select Broadsoft Group in the Type.
- 3. Click the SaveSet button to save the configuration.

Conference

The Htek IP Phone supports up to 5-way conference. You are allowed to configure the line

key to be used as a conference key. This key works same as **W**.

To configure the Conference via Phone Interface

- Press Menu → Features → Function Keys → Line Keys as Function Keys → Line Key2(for example)
- 2. Press \bigcirc and \bigotimes key to select the Conference in the Type field.
- 3. Press or Save soft key to save the configuration

To configure Conference via Web Interface

- 1. Click Function Keys \rightarrow Line Key.
- 2. Select the desired Key and select Conference in the Type.
- 3. Click the SaveSet button to save the configuration.

Forward

If the key is configured as Forward key, press this key under the idle status, the IP phone will turn to the Always Forward interface and you can set the Forward to number, then when there is any call to that number it will be forwarded to the set number automatically.

To configure the Forward via Phone Interface

- Press Menu → Features → Function Keys → Line Keys as Function Keys → Line Key2(for example)
- 2. Press > and < key to select the Forward in the Type field.
- 3. Enter the Number to forward to.
- 4. Press or Save soft key to save the configuration

To configure Forward via Web Interface

- 1. Click Function Keys \rightarrow Line Key.
- 2. Select the desired Key and select Forward in the Type.
- 3. Enter the Value with the number you want to forward to.
- 4. Click the SaveSet button to save the configuration.

Transfer

You are able to configure the key as a transfer key to perform the Blind/Attended/ Semi-Attended Transfer.

To configure the Transfer via Phone Interface

- Press Menu → Features → Function Keys → Line Keys as Function Keys → Line Key2(for example)
- 2. Press \bigcirc and \bigotimes key to select the Transfer in the Type field.

- 3. Enter the Number to transfer to
- 4. Press or Save soft key to save the configuration

To configure Transfer via Web Interface

- 1. Click Function Keys \rightarrow Line Key.
- 2. Select the desired Key and select Transfer in the Type.
- 3. Enter the Value with the number that wanted transfer to
- 4. Click the SaveSet button to save the configuration.

Hold

The key can be configured as a hold key. You can use this key to hold and resume a call during the conversation.

To configure the Hold via Phone Interface

- Press Menu → Features → Function Keys → Line Keys as Function Keys → Line Key2(for example)
- 2. Press \bigcirc and \bigcirc key to select the Hold in the Type field.
- 3. Press Or Save soft key to save the configuration

To configure Hold via Web Interface

- 1. Click Function Keys \rightarrow Line Key.
- 2. Select the desired Key and select Hold in the Type.
- 3. Click the SaveSet button to save the configuration.

Group Listening

With this feature, when you have an active call, you can listen using Handset and Free-speaker, but only can use the handset to speak.

To configure the Group listening via Phone Interface

- Press Menu → Features → Function Keys → Line Keys as Function Keys → Line Key2(for example)
- 2. Press > and < key to select the Group Listening in the Type field.
- 3. Press or Save soft key to save the configuration

To configure Group listening via Web Interface

- 1. Click Function Keys \rightarrow Line Key.
- 2. Select the desired Key and select Group Listening in the Type.
- 3. Click SaveSet to save the configuration.

DND

If the key is configured as DND key, allows you to activate the DND function immediately when you press it and the phone will reject all incoming calls automatically. Press it again to deactivate DND mode.

To configure the DND via Phone Interface

- Press Menu → Features → Function Keys → Line Keys as Function Keys → Line Key2(for example)
- 2. Press > and < key to select the DND in the Type field.
- 3. Press or Save soft key to save the configuration

To configure DND via Web Interface

- 1. Click Function Keys \rightarrow Line Key.
- 2. Select the desired Key and select DND in the Type.
- 3. Click the SaveSet button to save the configuration.

To enable DND feature

Press the DND soft key when the phone is idle status, and then DND icon is shown on the LCD.

To disable DND feature

Press the DND soft key again, and then there is no DND icon on the LCD.

Redial

If the key is configured as Redial key, you can redial the last placed call from the IP Phone.

To configure Redial via Web Interface

- 1. Click Function Keys \rightarrow Line key
- 2. Select the desired Key and select Redial in the Type.
- 3. Enter the Label displayed on LCD.
- 4. Click the SaveSet button to save the configuration.

SMS

Send SMS

To send SMS via web Interface

- 1. Click Setting→SMS
- 2. Select the Account (from which account the SMS sent)

- 3. Enter the targeted number
- 4. Input the content of SMS, and click Send.

Note:

Please contact the system administrator whether support this feature or not.

URL Record

The phone sends HTTP URL request to trigger a recording. Contact your system administrator for the predefined URL.

To configure the URL record via Phone interface

- Press Menu → Features → Function Keys → Line Keys as Function Keys → Line Key2(for example)
- 2. Press > and < key to select the URL Record in the Type field.
- 3. Fill the Value.
- 4. Press or Save soft key to save the configuration

To configure the record via Web Interface

- 1. Click Function Keys \rightarrow Line Key.
- 2. Select the desired Line Key and select URL Record in the Type.
- 3. Fill the Value.
- 4. Click the SaveSet button to save the configuration.

Paging

With this feature, you can call a paging group directly.

To configure the paging via Phone interface

- Press Menu → Features → Function Keys → Line Keys as Function Keys → Line Key2(for example)
- 2. Press > and < key to select the Paging in the Type field.
- 3. Enter the paging code followed the number.
- 4. Press > and < key to select the Account ID.
- 5. Press Or Save soft key to save the configuration

To configure the Paging via Web interface

- 1. Click Function Keys \rightarrow Line Key.
- 2. Select the desired Line Key and select Paging in the Type.
- 3. Enter the paging code followed the number.
- 4. Select the Account.
- 5. Click the SaveSet button to save the configuration.

Shared Line

Htek IP Phone supports "Share Call Appearance" by Broadsoft and XCast standard. This feature allows members of the SCA group to share SIP lines and provides status monitoring (idle, active, progressing, hold) of the share line. When there is an incoming call designated for the SCA group, all of the members of the group will be notified of an incoming call and will be able to answer the call from the phone with the SCA extension registered in the group.

All the users that belong to the same SCA group will be notified by visual indicator when a

user seizes the line and places an outgoing call, and all the users of this group will not be able to seize the line until the line goes back to an idle state or when the call is placed on hold (with the exception of when multiple call appearances are enabled on the server side).

In the middle of the conversation, there are two types of hold: Public Hold and Private Hold. When a member of the group places the call on public hold, the other users of the SCA group will be notified of this by the red-flashing button and they will be able to resume the call from their phone by pressing the line button. However, if this call is placed on private-hold, no other member of the SCA group will be able to resume that call.

To enable share call appearance, the user would need to register the share line account on the phone. In addition, they would need to navigate to "Account" -> "Advanced" on the webpage and set the line to "Share Line" and "SIP Server Type", and configure the line key or Line Key as "line" type with the desired account on webpage or LCD. If the user requires more share call appearances, the user can configure multiple line keys (Function Keys->Line key) to be "line" type associated with the account.

This feature is very useful in the boss and secretary scenario. For example, the secretary can share the boss' extension number on her phone. When there is an incoming call to the extension number of the boss, both the phones of the boss and the secretary will ring simultaneously. Either the boss or the secretary can answer the call. Calls on share line can be placed on hold or barged in.

To configure the line key as line via Phone interface

- Press Menu → Features → Function Keys → Line Keys as Function Keys → Line Key2(for example)
- 2. Press > and < key to select the Line in the Type field.
- 3. Press > and < key to select the Account ID.
- 4. Enter the Label
- 5. Enter the Value
- 6. Press or Save soft key to save the configuration

To configure the line key as line via Web Interface

- 1. Click Function Keys \rightarrow Line Key.
- 2. Select the desired Line Key and select Line in the Type.
- 3. Enter the Value.
- 4. Enter the Label.
- 5. Select the Account
- 6. Click the SaveSet button to save the configuration and then restart.

Note:

This feature is not available on all servers. For more information, contact your system administrator.

Public Hold

The key can be configured as a public hold key. During a conversation, all members belonging to that particular SLA group can use this key to hold or resume a call.

To configure the Public hold via Phone interface

- Press Menu → Features → Function Keys → Line Keys as Function Keys → Line Key2(for example)
- 2. Press > and < key to select the Public Hold in the Type field.
- 3. Press () or Save soft key to save the configuration

To configure public hold via Web Interface

- 1. Click Function Keys \rightarrow Line Key.
- 2. Select the desired Key and select Public Hold in the Type.
- 3. Click the SaveSet button to save the configuration.

El-Itek

Hot Desking

Hot Desking originates from the definition of being the temporary physical occupant of a work station or surface by a particular employee. A primary motivation for Hot Desking is cost reduction. This feature is regularly used in places where all employees are not in the office at the same time, or not in the office for a very long time, which means their personal offices are often vacant, consuming valuable space and resources.

You can use Hot Desking on the IP phone to logout the existing accounts and then log in a new account, which allows many users to share the phone resource in different times. To use this feature, first you need to configure a Hot Desking key in the advance settings. This feature is supported on the version 1.0.3.82 or later

To configure the hot desking via Phone interface

- Press Menu → Features → Function Keys → Line Keys as Function Keys → Line Key2(for example)
- 2. Press > and < key to select the Hot Desking in the Type field.
- 3. Enter the display name in the Label field.
- 4. Press () or Save soft key to save the configuration

To configure the hot desking via Web interface:

- 1. Click Function Keys \rightarrow Line Key.
- 2. Select the desired Key and select Hot Desking in the Type.
- 3. Select the desired account from the pull-down list of Account field.
- 4. Click the SaveSet button to save the configuration.

To use the hot desking feature on the user interface:

- 1. Press the Hot Desking key when the IP Phone is idle.
- 2. Enter the Extension number and password
- 3. Click Save soft key

You can see the account information which has changed.

Note:

This feature is not available on all servers. For more information, contact your system administrator.

ACD

ACD feature is often used in offices for customer service, such as call center. The ACD system handles large volumes of incoming calls from callers who have no need to talk to a specific person but who require assistance from any of the different personnel at the earliest point. The ACD feature on the Htek IP Phone allows the ACD system to distribute calls from large volumes of incoming calls to the registered IP phone users. To use this feature, first you should configure an ACD key in the advance settings.

To configure the ACD via Phone interface

- Press Menu → Features → Function Keys → Line Keys as Function Keys → Line Key2(for example)
- 2. Press > and < key to select the ACD in the Type field.
- 3. Enter the label in the Label field.
- 4. Select the desired account in the Account ID field.
- 5. Press () or Save soft key to save the configuration

To configure the ACD via Web interface:

- 1. Click Function Keys \rightarrow Line Key.
- 2. Select the desired Key and select ACD in the Type.
- 3. Enter the label in the Label field.
- 4. Select the desired account from the pull-down list of Account field.
- 5. Click the SaveSet button to save the configuration.

Note:

This feature is not available on all servers. For more information, contact your system administrator.

Zero Touch

You can use this key feature to configure auto provision and network parameters quickly. This feature is supported on the version 1.0.3.82 or later

To configure the zero touch via Phone interface

- Press Menu → Features → Function Keys → Line Keys as Function Keys → Line Key2(for example)
- 2. Press > and < key to select the Zero Touch in the Type field
- 3. Press Or Save soft key to save the configuration

To configure the zero touch via Web interface:

- 1. Click Function Keys \rightarrow Line Key.
- 2. Select the desired Key and select Zero Touch in the Type.
- 3. Click the SaveSet button to save the configuration.

To use the zero touch feature on the user interface:

- 1. Press the Zero Touch key when the IP Phone is idle.
- 2. Press the OK soft key and the IP Phone will enter the WAN Port interface; you can change the WAN Type by pressing the Navigation keys.
- 3. Press the Next soft key to enter Network interface, then you can configure some information.
- 4. Press the Next soft key again, you can configure auto provision information.
- 5. When you finish the setting, you can press the OK to accept the changes.

Note:

This feature is not available on all servers. For more information, contact your system administrator.

Multicast Paging

You can use multicast paging to quickly and easily forward out time sensitive announcements to people within the multicast group. You can configure a multicast paging key or a paging list key on the phone, which allows you to send a Real Time Transport Protocol (RTP) stream to the pre-configured multicast address/addresses without involving SIP signaling. You can configure the phone to receive an RTP stream from pre-configured multicast listening address/addresses without involving SIP signaling. You can specify up to 10 multicast listening addresses.

Sending RTP Stream

To configure a multicast paging key via Phone interface

- 1. Press Menu \rightarrow Features \rightarrow Line Key \rightarrow Line Key2 (e.g.)
- 2. Press \bigcirc and \bigcirc or switch key to select the Multicast Paging in the Type field.
- 3. Enter the multicast IP address and port number (e.g., 224.5.6.20:2000) in the Value field.

The valid multicast IP addresses range from 224.0.0.0 to 239.255.255.255.

4. Press () or Save soft key to save the configuration

To configure a multicast paging key via Web interface

- 1. Function Keys->Line Key
- 2. Select the desired Key and select Multicast Paging in the Type.
- 3. Enter the multicast IP address and port number (e.g., 224.5.6.20:2000) in the Value field.

The valid multicast IP addresses range from 224.0.0.0 to 239.255.255.255.

4. Click the SaveSet button to save the configuration.

Sending RTP Stream:

Press the Multicast Paging key when the phone is idle.

The phone sends RTP to a preconfigured multicast address (IP:Port). Any phone in the local network then listens to the RTP on the preconfigured multicast address (IP:Port). For

both sending and receiving of the multicast RTP, there is no SIP signaling involved. The multicast paging key LED illuminates solid green.

Receiving RTP Stream

You can configure the phone to receive a Real Time Transport Protocol (RTP) stream from the pre-configured multicast address/addresses without involving SIP signaling. You can specify up to 10 multicast addresses that the phone listens to on the network.

How the phone handles incoming multicast paging calls depends on Paging Barge and Paging Priority Active parameters configured via web user interface.

Paging Barge

The paging barge parameter defines the priority of the voice call in progress. If the priority of an incoming multicast paging call is lower than that of the active call, it will be ignored automatically. If Disabled is selected from the pull-down list of Paging Barge, the voice call in progress will take precedence over all incoming multicast paging calls.

Valid values in the Paging Barge field:

- 1 to 10: Define the priority of the active call, 1 with the highest priority, 10 with the lowest.
- Disabled: The voice call in progress will take precedence over all incoming paging calls.

Paging Priority Active

The paging priority active parameter decides how the phone handles incoming multicast paging calls when there is already a multicast paging call on the phone. If enabled, the phone will ignore incoming multicast paging calls with lower priorities, otherwise, the phone will answer incoming multicast paging calls automatically and place the previous multicast paging call on hold. If disabled, the phone will automatically ignore all incoming multicast paging calls.

Multicast Codec:

3.

You can only configure the codec by Web interface.

To configure multicast codec key via Web interface

- 1. Click Directory ->Multicast Paging:
- 2. Select the desired codec from the pull-down list of Multicast Codec

Click the SaveSet

button to save the configuration.

To configure multicast listening addresses via Web interface:

- 1. Click Directory->Multicast Paging.
- 2. Select the desired value from the pull-down list of Paging Barge.
- 3. Select the desired value from the pull-down list of Paging Priority Active.
- 4. Enter the multicast IP address/addresses and port number (e.g., 224.5.6.20:2000) which the phone listens to for incoming RTP multicast in the Listening Address field.
- 5. Enter the label in the Label field.

| | | | SaveSet | Cancel | | | | |

Note:

The priorities of listening to multicasting addresses can be predefined: 1 being the highest priority, 10 with the lowest in priority order. Both the multicast paging sender and receiver's phones play a warning tone when establishing a multicast paging call. Listening to Multicasting addresses can be configurable via Web interface only.

Upgrade

Factory Reset

To set Factory Reset by Phone interface

- 1. Press Menu \rightarrow Settings \rightarrow Advanced Setting (default password: **admin**) \rightarrow Phone Setting \rightarrow Factory Reset
- 2. Press OK soft key in the warning page.

To set Factory Reset via Web interface

1. Click Management \rightarrow Upgrade

Upgrade

To upgrade via HTTP, the "Management"-> "auto provision" -> "Firmware Upgrade"-> "Upgrade Mode" field needs to be set to HTTP, respectively. "Firmware Server Path" needs to be set to a valid URL of a HTTP server, server name can be in either FQDN or IP address format. Here are examples of some valid URL.

- e.g. firmware.mycompany.com:5688/Htek
- e.g. www.mycompany.com:5688/fm/ Htek
- e.g. 218.2.83.110

Instructions for firmware upgrade via HTTP:

(1) End users can choose to download the free HTTP server from http://httpd.apache.org/ or use

Microsoft IIS web server. Then setup HTTP server.

(2) Unzip the firmware file and put all of them under the *root*/fm directory of the HTTP server.

(3) Visiting "http://192.168.0.254/fm/fw924.rom on localhost by browser" to verify the HTTP Server. If visiting "http://192.168.0.254/fm/fw924.rom on another computer and it not prompted to download fw924.rom file on this computer, please check if the firewall is on or off (Suggest you turn off the firewall).

To configure the server path via Web interface:

- 1. Click Management→Auto provision:
- 2. Select the upgrade mode in the Upgrade Mode field
- 3. Enter the Firmware Server Path and Config Server Path (192.168.0.254 is HTTP server).
- 4. Enter the HTTP server's username and password (optional).
- 5. Click the SaveSet button to save the configuration.
- 6. Restart the UC924, IP Phone will restart and auto-get firmware files from HTTP server.

NOTES:

- Htek recommends end-user use the Htek HTTP server. For large companies, we recommend to maintain their own TFTP/HTTP/FTP/HTTPS server for upgrade and provisioning procedures.
- Once a "Firmware Server Path" is set, user needs to update the settings and restart the IP Phone. If the configured firmware server is found and a new code image is available, the UC924 will attempt to retrieve the new image files by downloading them into the UC924's SDRAM. During this stage, the UC924's LEDs will blink fastly until the checking/downloading process is completed. Upon verification of checksum, the new code image will then be saved into the Flash. If TFTP/HTTP/FTP/HTTPS fails for any reason (e.g. TFTP/HTTP/FTP/HTTPS server is not responding, there are no code image files available for upgrade, or checksum test fails, etc), the UC924 will stop the TFTP/HTTP/FTP/HTTPS process and simply boot using the existing code image in the flash.

- Firmware upgrade may take as long as 3 to 8 minutes over Internet, or just 1 minutes if it is performed on a LAN. It is recommended to conduct firmware upgrade in a controlled LAN environment if possible. For users who do not have a local firmware upgrade server.
- ➤ Htek's latest firmware is available at <u>www.htek.com</u> → Support → Document & Firmware.
- Oversea users are strongly recommended to download the binary files and upgrade firmware locally in a controlled LAN environment.

To upgrade manually via the Web configuration interface

- 1. Click Management \rightarrow Upgrade
- 2. Click Choose file or the blank.
- 3. Select the firmware (fw924.rom) and then click

Troubleshooting

Why is the phone LCD screen blank?

- Ensure your phone is properly plugged into a functional AC outlet.
- Ensure that the phone isn't plugged into a plug controlled by a switch that is off.
- If the phone is plugged into a power strip, try plugging it directly into a wall outlet instead.
- If your phone is powered from PoE, ensure you use a PoE compliant switch or hub, or contact your system administrator for more information.
- Check if the power LED is on to ensure that the phone is powered on.

Why does the phone display "Network Unavailable"?

To resolve:

- Ensure that the Ethernet cable is plugged into the Internet port on the phone and the Ethernet cable is not loose.
- Ensure that the switch or hub in your network is functioning well.
- If the problem still persists, Contact your system administrator for more information.

Why can't I get a dial tone?

To resolve:

- Check for any loose connections and that the phone has been installed properly. For the Installation instructions, refer to the phone installation section.
- Check whether dial tone is present on one of the audio modes.
- Switch between the Handset, Headset (if you have) or Hands-Free Speakerphone to check whether dial tone is present for one of the audio modes.
- If the dial tone exists on another audio mode, connect a different handset or headset to isolate the problem.

Where to set the tone?

You can set the tone on Web interface:

- Click Setting→Tones
- Define the dial tone, ringing, busy tone...
- For the tones, you can check with your system administrator.
- For More Click <u>Tone Notes</u>.
